

PRODUCT NEWS

3D Model Service

AnatoModels use a CBCT scan and a single digital facial photo to generate complete volumetric and radiographic records as well as dynamic digital 3D dental study models and facial models, according to the developer. Featuring precise measurement tools and nerve and implant integration, the system is designed to allow virtual movement of individual teeth for effective case presentations.

For more information, contact Anatomage, Inc., 111 N. Market St., Suite 899, San Jose, CA 95113. (408) 885-1474; www.anatomage.com.

Impression Material

GC America has introduced a new generation of impression material, EXA'lence vinyl polyether silicone (VPES), whose highly hydrophilic properties and optimal flow characteristics can capture finer details than either polyether or vinyl polysiloxane impression material, even in a moist environment, according to the company. EXA'lence is designed for high tear strength, elasticity, and dimensional accuracy

and has a mild, minty flavor to appeal to patients.

For more information, contact GC America, Inc., 3737 W. 127th St., Alsip, IL 60803. (800) 323-7063; www.gcamerica.com.

Light Panel Diffusers

USA Skypanels replace common plastic fluorescent light diffusers with decorative acrylic panels in several designs featuring sky, clouds, and trees, promoting a more pleasant office or clinic environment, according to the manufacturer. The panels

come in a standard size of 24" × 48" that can be customized with a razor knife to fit virtually any flat fluorescent ceiling fixture. The non-profit manufacturer donates a portion of sales to cancer research and the Make-a-Wish Foundation.

For information, contact USA Skypanels, Inc., 6180 Laurel Canyon Blvd., Suite 320, North Hollywood, CA 91606. (888) 475-9726; www.usaskypanels.com.

LED Dental Lamps

Philips Lumileds, a leading manufacturer of high-power LEDs, offers a Luxeon LED-based dental lamp that is 40% brighter than a halogen unit; lasts 12-15 years, as compared to three to six months, with a 60% reduction in power consumption; and has less effect on light-cured resins, according to the company. The Gnatus LED Plus requires no reflectors, resulting in a smaller, sleeker lamp design.

For more information, contact Philips Lumileds, 370 W. Trimble Road, San Jose, CA 95131. (888) 589-3662; www.philipslumileds.com.

Web Marketing Tool

Now available as a stand-alone website add-on, LinkBox appears as a graphic icon on a practice website. When a viewer clicks the link, an interactive web page appears, encouraging the viewer to send a message, request an appointment, refer a friend, or redeem an offer. All transactions are tracked, and the practice can easily access reports on any activity, according to the developer.

For more information, contact CDs-2-Go, Inc., 2119 W. Cass St., Tampa, FL 33606. (877) 258-3771; www.CDs-2-Go.com.

Molar Bracket Tweezers

ProPlace direct-bond posterior bracket placement instruments feature smaller jaws and encourage a more natural hand position than a conventional tweezer, resulting in a superior field of vision and fast, accurate bracket placement, according to the manufacturer. The tweezer's "syringe" handle style is designed to grip and release the bracket with less operator fatigue. The ProPlace instrument is manufactured from surgical stainless steel and can be sterilized by either autoclave or dry heat.

For additional information, contact DG Industries, 226 Viking Ave., Brea, CA 92821. (714) 990-3787; www.dgindustries.com.
